GT SoftGOT2000

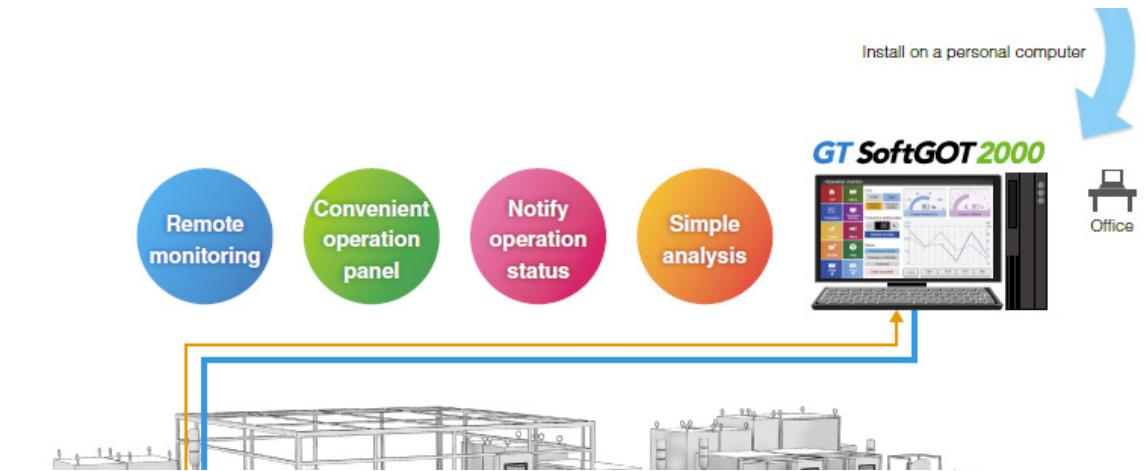

GT SoftGOT2000 is the HMI software that runs on personal computers and panel computers. It can be used to monitor and operate the information of industrial devices that are connected to a personal computer or a panel computer via a network.

* GT SoftGOT2000 is a software included in GT Works3. A separate license key (GT27-SGTKEY-U) must be installed during use.
For the details, please contact your local sales office.

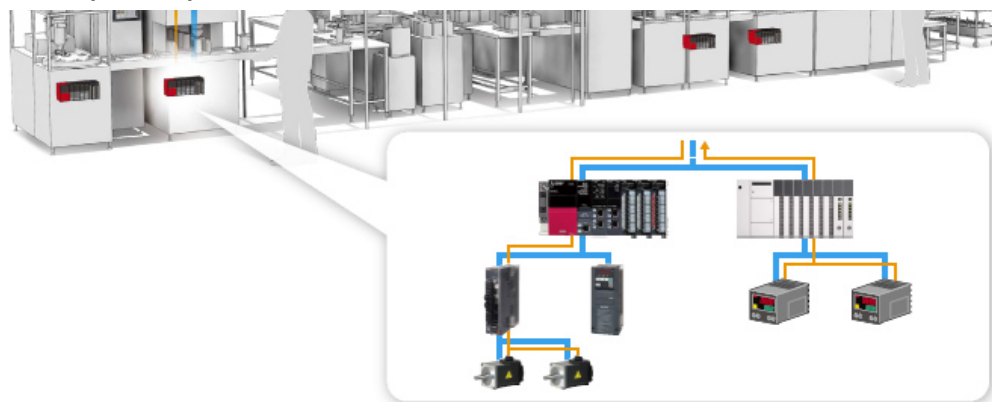

Monitor the shop floor from a remote location by monitoring and operating the information of various industrial devices.

As a remote monitoring tool from your office

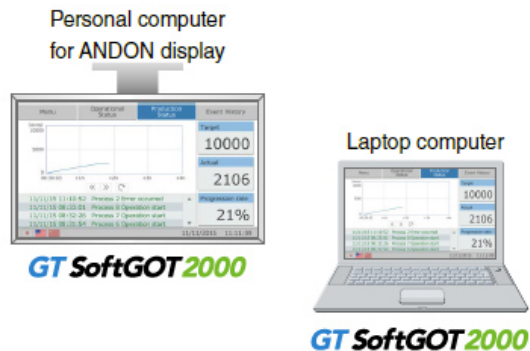

As the operation panel of devices

As a tool to notify operators of necessary information

The resolution can be set flexibly.
By using a large display or a laptop computer, ANDON display and simple remote monitoring can be performed so that operators in a remote location can be notified of the operation status.

Supported resolution
X × Y: 640 to 1920 dots × 480 to 1200 dots

page top

For edge computing purposes

Supporting Edgexcross, which is the open software platform in Japan in the edge computing field that coordinates factory automation and IT systems.
Edgexcross interaction function easily visualizes the data collected and processed by Edgexcross.
